ANNOUNCEMENTS

A L McCawley authorizes the News to announce his candidacy for the democratic nomination for the office of prosecuting attorney of Jasper county. His platform is: "Strict enforcement of the law—as strong as the law and no stronger; as weak as the law and no weaker—regardless of the individual or class or offenders it may affect." He solicits your support and influence.

The News is authorized to announce the name of J. B. Chaffee, of Carthage for the office of Recorder of Deeds of Jasper County, subject to the action of the Republican county convention.

The News is authorized to announce the name of Thos. Brock, of Sheridan township, as a candidate for the office of Judge of the County Court for the Eastern District of Jasper county, subject to the action of the county Democratic convention.

The News is authorized to announce the name of H. G. Tanger of Madison township as a candidate for sheriff subject to the action of the Republican county convention.

It looks though we are going to have the biggest corn crop that ever happened in Southwest Missouri before. Let her come.

That may have been a "put up job" on Constable Roberts at Joplin the other night, but he should not have been so easily taken in by that kind of a job

John D Rockefeller comes back from a trip to Europe with a desire to get better acquainted with his fellow Americans. Is John thinking about raising the price of oil?

The death of Russell Sage has given a good opportunity for the moralists to talk on the folly of accumulating wealth. Happily Jasper folks are in no need of this kind of moralizing.

Get your big pumpkins, squashes, watermelons and fruit ready for the Knell Fair September 4, 5, 6, 7. Jasper is generally well represented at the fair and this year ought to be no exception.

After a campaign of education as to the merits of having a saloon, which has been going on in the Lockwood Missourian for some time; a saloon man has "fallen down" in trying to get enough signers for a saloon at that place. Good for Lockwood.

It Depends on the Man

The Carthage Democrat in a note of warning to the Democratic party on the eve of that party's primaries and county convention, gives some pertinent truths which not only the Democratic party, but the Republican party as well, would do well to heed.

Here are a few extracts from Brother Roach's pen:
"Honesty compels the candid to admit that Jasper is a doubtful county.

"The election of Douglas as governor of Massachusetts, Patterson in Ohio, Johnson in Minnesota, the Roosevelt presidential electors in Missouri, and of Warner as the successor of Senator Cockerel, speaks in thunder tones of the power of independent voters—that citizen who may be democrat or republican, but who is capable and analyze issues and vote for the man that he regards will as an official best carry out his ideas of what civil government should be.

"This county has always been famous for having within its borders a large independent vote that has generally been neither democratic nor republican. They are not the kind that can be bought and sold. They are governed by convictions, and are as law abiding and respectable as the best.

"To their number may be added that class of independent party men that always "vote for the man" and take his name off the other ticket and write it on theirs. These independent democrats and independent republicans are an uncertain quantity. They are the kind that elected Cleveland governor of New York, and made Bradley, a republican, governor of old Kentucky.

"This voter is an uncertain quantity in Jasper county. He is ordinarily a party man, but a party man of most pronounced conviction. He votes for what he thinks is right, and he votes as fearlessly as the early Christian martyrs faced persecution and death.

"Whether the democratic or republican party wins in this campaign depends mainly on the men nominated and what the people with convictions think of the different nominees."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

FOR SALE—Forty acres of land within 3/4 of a mile of town. Will see in 10, 20, 30 acre tracts or the whole 40. Just the thing for poultry or small fruit farm. Inquire at this office.

In Self Defense

Major Hamm, editor and manager of the Constitutionalist, Eminence, Ky., when he was fiercely attacked, four years ago, by Pills, bought a box of Bucklen's Arnica Salve, of which he says, "It cured me in ten days and no trouble since." JUST A LITTLE GEOLOGY

FROM OUR SCIENTIFIC RESEARCH
IN COLORADO

What "Struck" Us On The Journey
Between Pueblo And
Denver

A visit to Colorado awakens an unusual interest in the study of geology. Here one sees a great many what seems to us freaks of nature. One becomes to wonder what this old earth of ours is really made of and what is the cause of some of these freaks. Heretofore the geologist's talks about the glacier period has been somewhat hazy to us, but after a look at Pueblo we seem to see a ray of light as to what the glacier period had to do with the formation of the earth. Slice off a piece of layer cake and you get an idea of the formation of the cake. Some of these bluffs around Pueblo look as though some huge knife had sliced the outer edge off, revealing as it were, a huge layer cake, its various layers of strata being easily distinguished, here a layer of earth and a layer of stones. These stones are what took our eye and gives us some comprehension of what the scientists talk about when they tell us that a great deal of the present surface of the earth has slid down from the mountains in the form of glaciers. The stones which we would call cobble stones are of all shapes and sizes yet are perfectly smooth with no rough edges, just as though each stone had been rounded and polished by hand. If you would find one of these stones around Jasper you would pick it up and keep it as a curiosity, but they are numerous in Colorado that they attract no attention save from easterners on their first visit to the west. We are now going to give you a little geology as to how these

stones came to be so round and smooth. The action of the glacier sliding down the mountain bring the stones in contact with each other and the grinding and rolling all jumbled up together eventually wears off the rough corners and they have gradually become polished. Of course this is the work of ages and ages. What? Do we hear a snicker from our learned geologist at our homely treatise on geology? But as we have said in a previous letter, your "facts and figures" may not be able to withstand the light of science, but this is the way that we size it up. However if the learned scientist differ with us on this important subject perhaps you had better take the theory of the scientist as more liable to be correct.

So much for geology around Pueblo. Let us leave Pueblo and start for Denver. In travelling through a country which one knows only by what he has read or been told about it, one associates a town or location with something unusual that has occurred at that place. For instance, as one passes through Osawatimie, in Kansas, he who is acquainted with history will recall that old John Brown the radical abolitionist once made his headquarters there. We will never think of Hoisington, Kansas without being reminded that here is where we turn back our watches just one hour in going west and turn them up an hour in coming east changing from "Central time" to mountain time and vice versa. So it was as left Pueblo on our way to Denver. We had gone but a little way before we were made aware that the train was approaching a place where something unusual had happened. We realized this from the fact that the conversation on the train turned to one subject—"The Eden wreck." The Eden wreck occurred something like a year ago as most of us will remember, and was one of the most disastrous railway catastrophes in the annals of our country. Eden is a little station a few miles out from Pueblo
